RESOURCES INTERNATIONAL

Gold & Critical Mineral Exploration in Tier-1
Canadian Jurisdictions

INVESTMENT HIGHLIGHTS

Key attributes supporting Atacama's exploration strategy and discovery potential.

FLAGSHIP GOLD ASSET

- Flagship gold asset in the Kirkland Lake district within Ontario's Abitibi Greenstone Belt—one of Canada's most prolific gold regions.

HISTORICAL DRILLING CONFIRMATION

- Previous drilling has identified multiple gold-bearing horizons, including visible gold and mineralization open along strike and at depth.

STRATEGIC LOCATION

- Positioned near existing mining infrastructure, including proximity to Agnico Eagle's Macassa Mine in the Kirkland Lake district.

PORTFOLIO OPTIONALITY

- Additional exploration assets provide exposure to critical minerals, including lithium, rare earth elements, cobalt, and graphite.

EXPERIENCED TEAM

- Experienced geological and leadership team guiding disciplined exploration and structured capital deployment.

WHY ATACAMA. WHY NOW.

Atacama Resources is a U.S.-listed mineral exploration company focused on advancing strategically located assets within established Canadian mining districts.

With a flagship gold property in the prolific Kirkland Lake region and additional exposure to critical minerals, the Company is entering a new phase of disciplined operational focus.

Following the revocation of a previously issued cease trade order, management is focused on disciplined exploration and structured capital deployment to unlock long-term asset value.

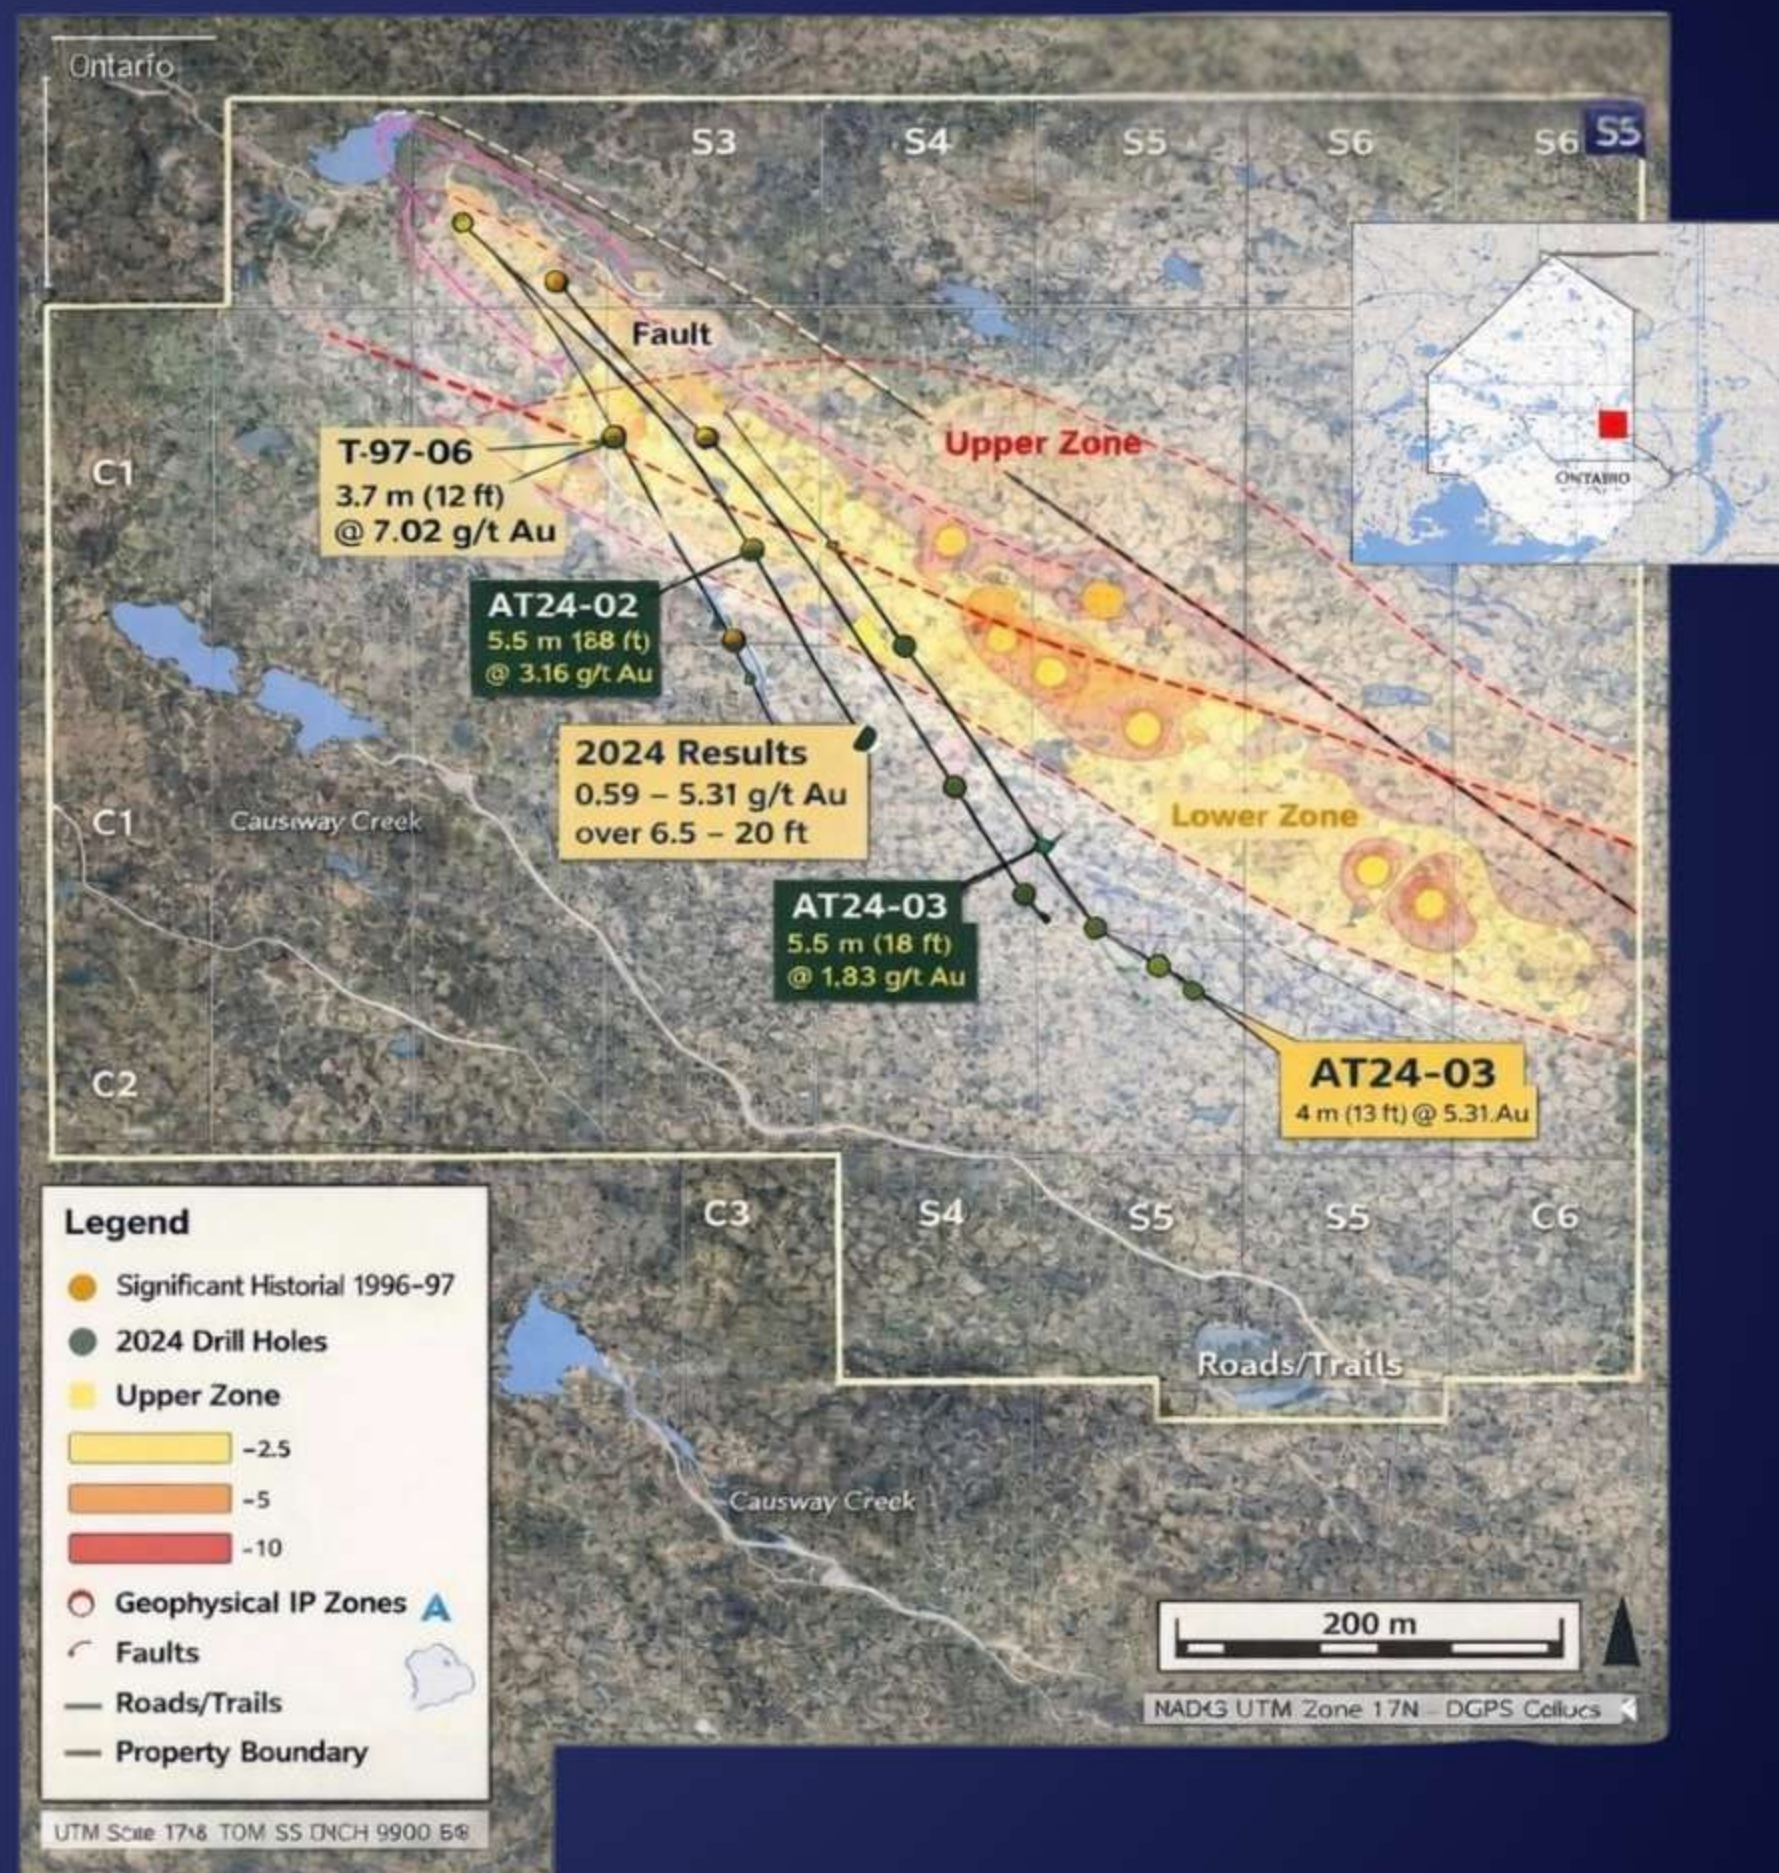

- Flagship gold asset located in the Kirkland Lake district, a historically prolific Canadian gold camp
- Historical drilling confirms multiple gold-bearing horizons, including visible gold and mineralization open at depth
- Near-term exploration program focused on validating structural extensions and advancing resource potential
- Operational reset following CTO revocation provides renewed focus on disciplined execution
- Additional critical mineral assets offer long-term strategic optionality

TANNAHILL

Flagship Asset Overview

The Tannahill Property is a structurally controlled gold exploration project located within Ontario's Abitibi Greenstone Belt, in the prolific Kirkland Lake district—one of Canada's most established and infrastructure-rich gold camps.

- 29 claim units northeast of Kirkland Lake
- Located within a historically prolific gold-producing region
- Structural alignment with northeast-trending fault systems
- Proximity to past and current gold producers

TANNAHILL

Geological Setting & Structural Framework

The Tannahill Property lies along a northeast-trending structural corridor within Ontario's Abitibi Greenstone Belt, a region that hosts several world-class gold deposits and long-life mining operations.

- 29 claim units northeast of Kirkland Lake
- Located within a historically prolific gold-producing region
- Structural alignment with northeast-trending fault systems
- Proximity to past and current gold producers

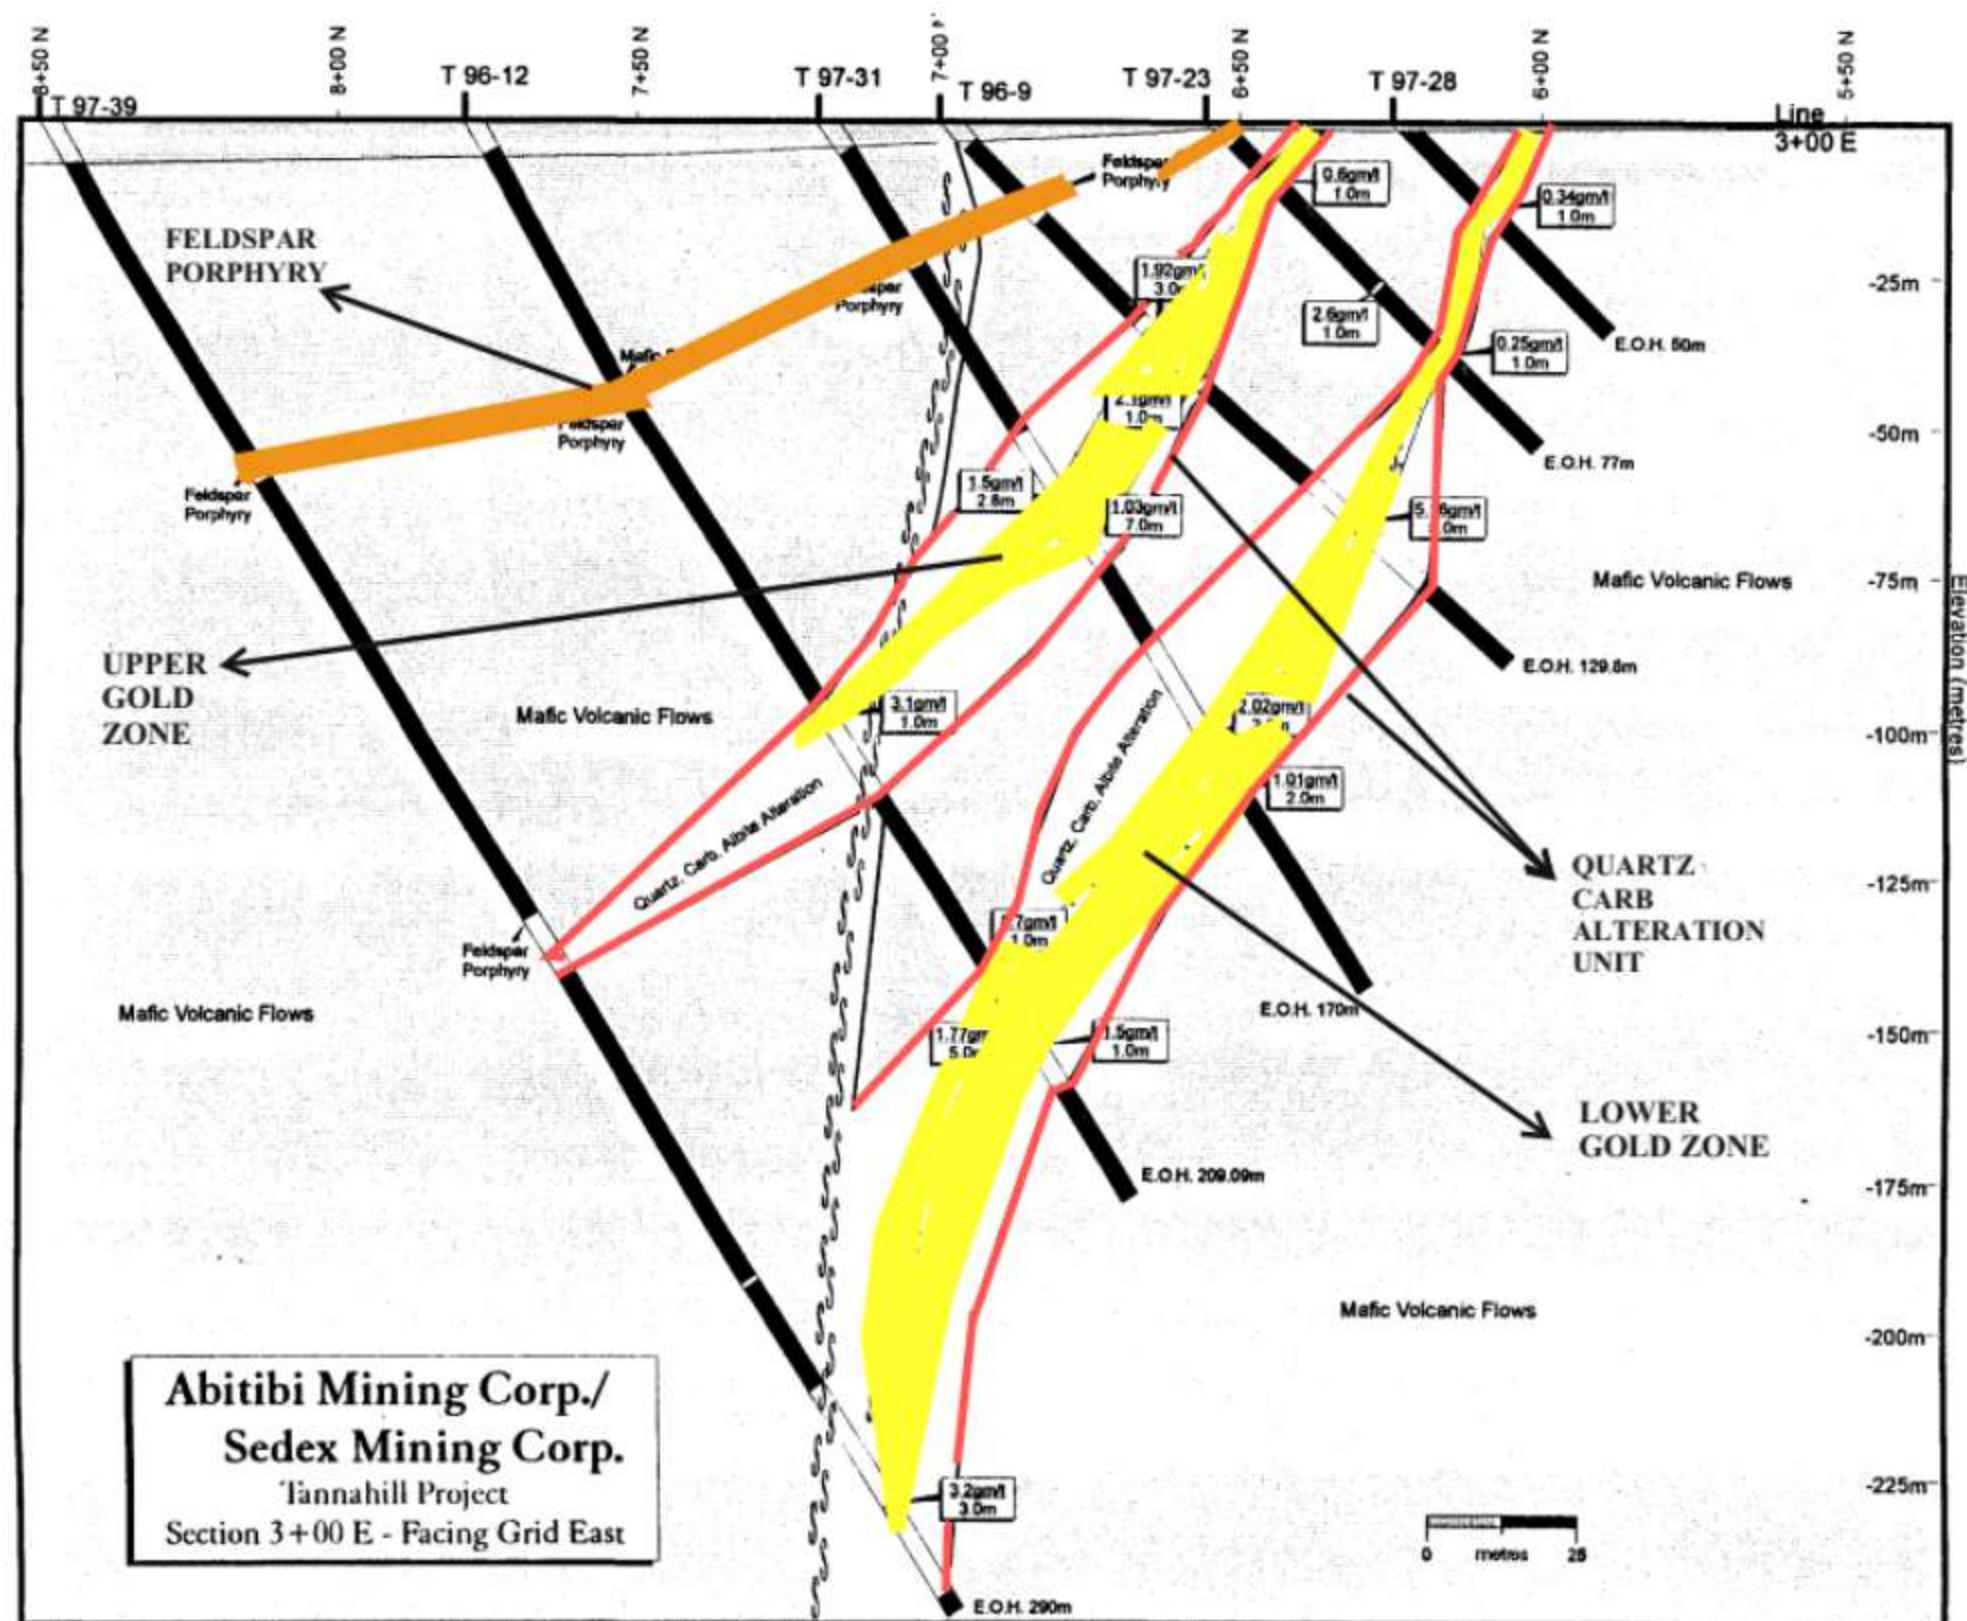

TANNAHILL

Historical Drilling & Gold Mineralization

Reported intercepts include:

- 5.16 g/t Au over 5.0 m (T-96-9)
- 4.80 g/t Au over 5.0 m (T-96-11)
- 7.02 g/t Au over 3.7 m (T-96-15)

- A total of 6,171 metres of diamond drilling completed across six historical drill programs (1996– 1997)
- Two parallel, north-dipping gold-bearing shear zones identified (Upper & Lower Zones)
- 27 of 28 drill holes intersected significant gold values
- Lower Zone demonstrates continuity over ~300 metres of strike and remains open in both directions

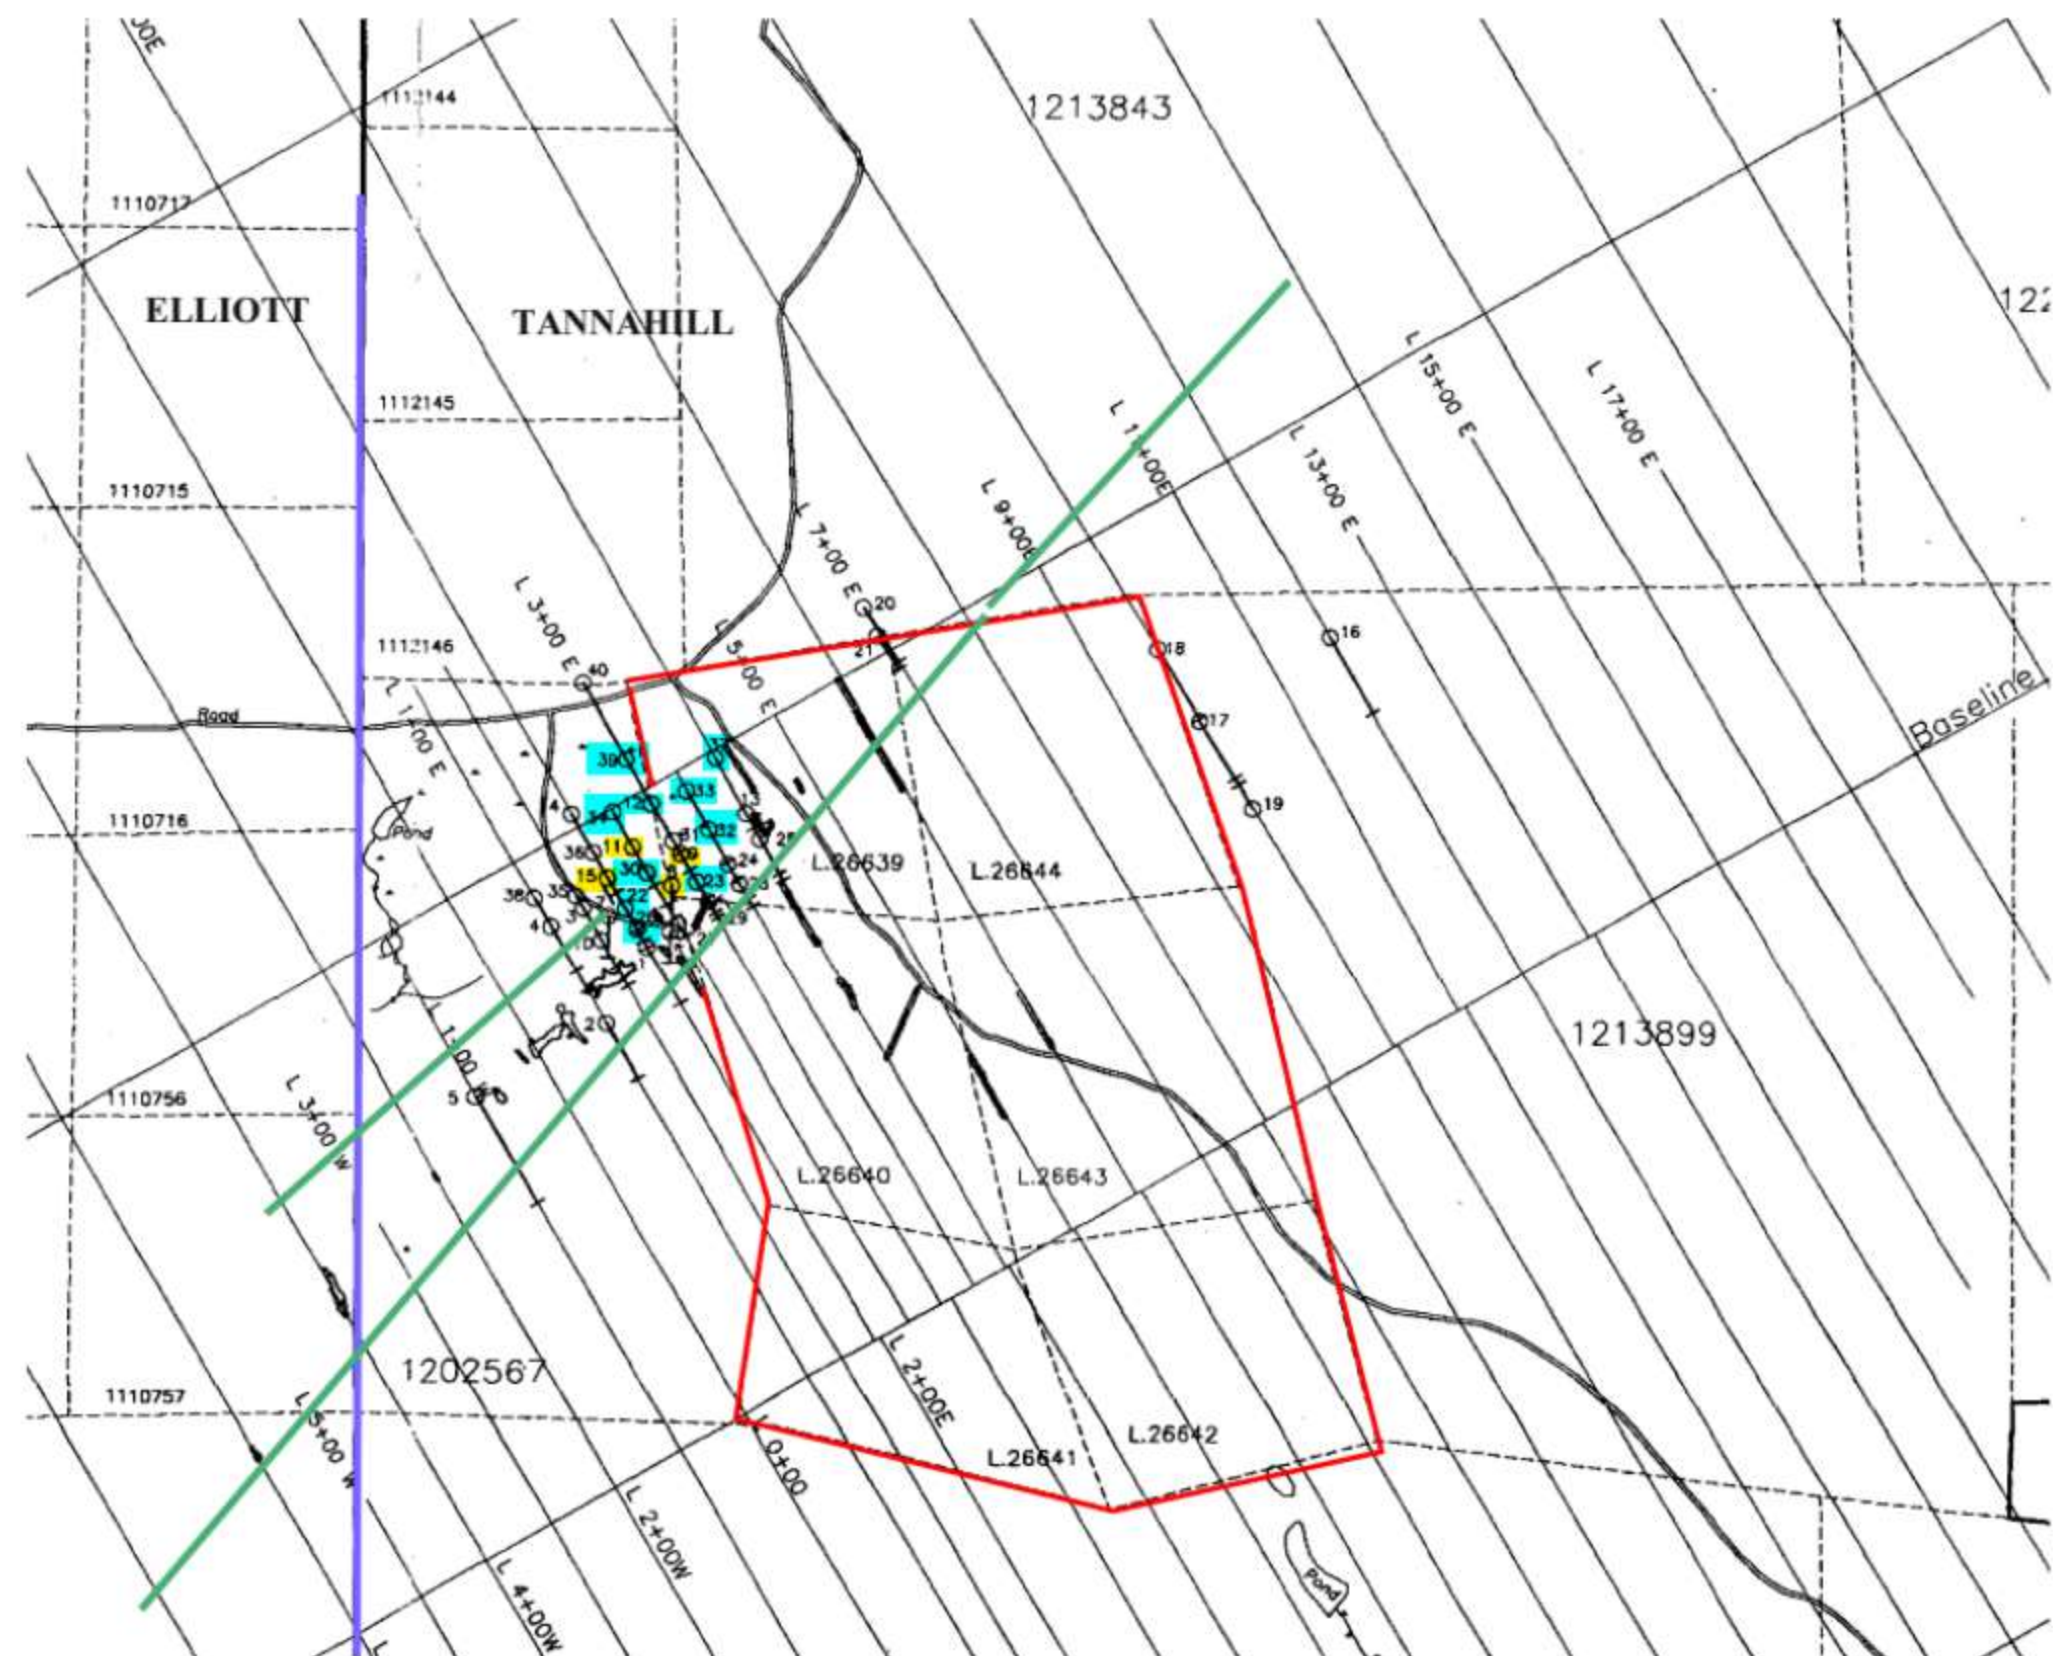

*Historical results do not constitute current mineral resources or reserves.
No NI 43-101 compliant resource has been established.*

TANNAHILL

Near-Term Exploration Program

With historical drilling confirming strong gold mineralization, the next phase of work is focused on expanding and refining known zones through disciplined drilling and targeted geophysical surveys to unlock the project's next stage of growth.

- Continued drilling along the northeast structural trend
- Testing deeper extensions and structural intersections
- Follow-up geophysical surveys to refine priority targets
- Objective: advance the project toward potential future resource delineation through systematic drilling and structural targeting

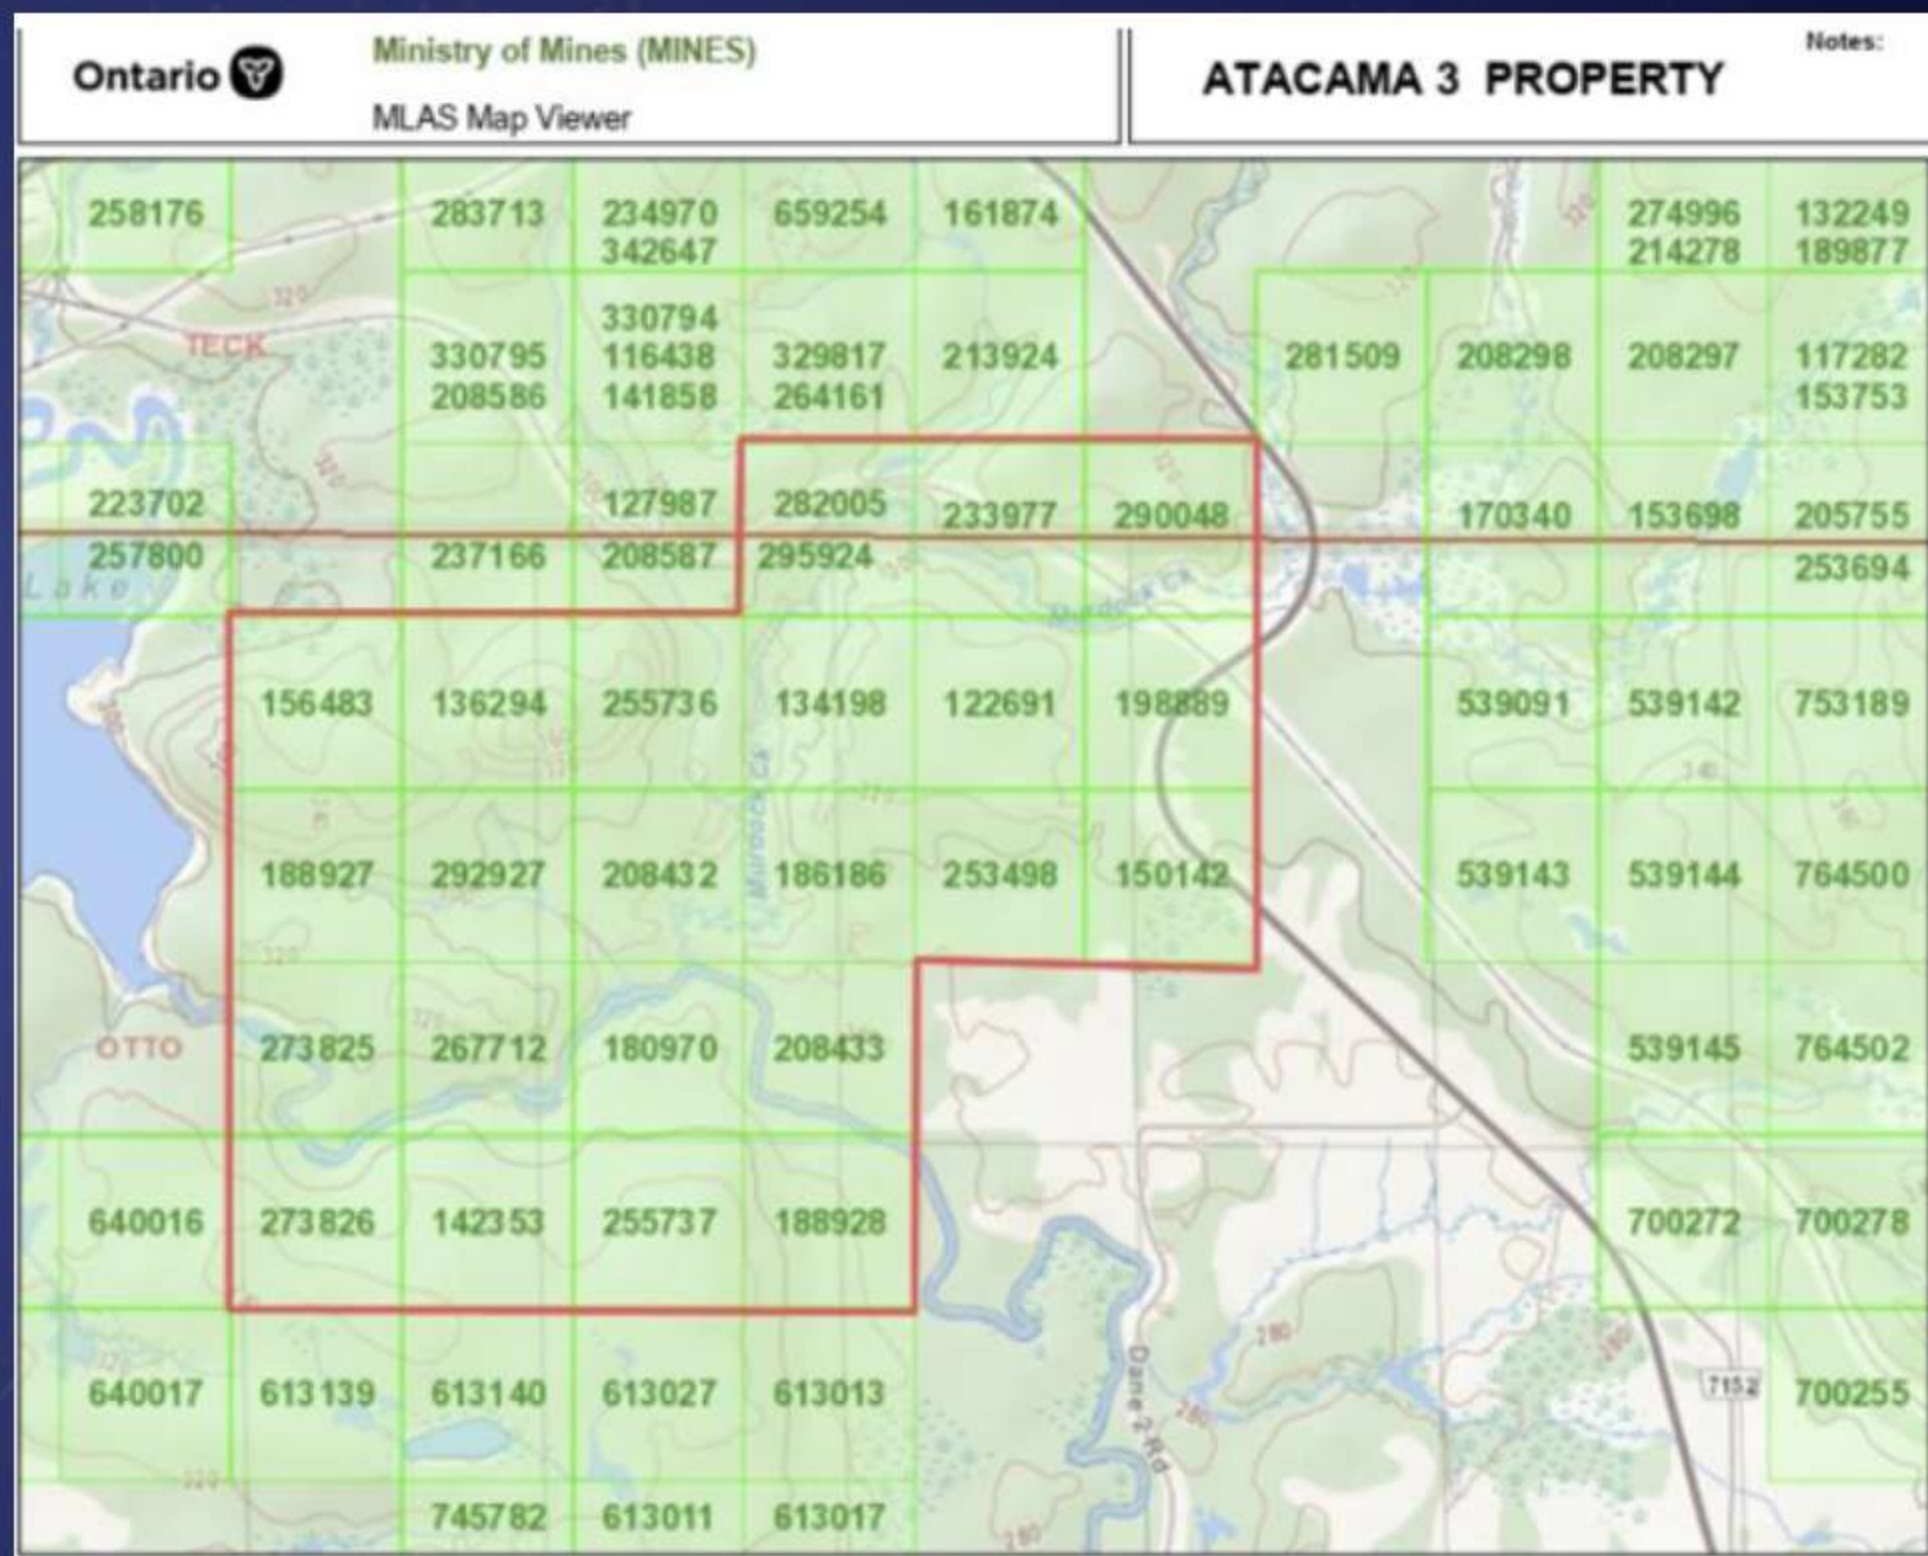

ATACAMA 3

PROPERTY OVERVIEW

The Atacama #3 Property is a gold exploration asset located within the Kirkland Lake district, immediately south of Agnico Eagle's Macassa Mine—one of Canada's highest-grade underground gold operations. Its position within this structurally active corridor supports systematic exploration targeting extensions of regional mineralized systems.

- Approximately 720 acres of contiguous mining claims near Kirkland Lake, Ontario
- Located ~2 miles south of Agnico Eagle's Macassa Mine expansion area
- Positioned within a prolific Abitibi Greenstone Belt gold district
- Geological interpretation identifies structural and mineralization targets for future drilling

Ground geophysical survey completed with technical report prepared by
J.C. Grant, CET, FGAC.

Atacama Resources

BROADER MINERAL ASSET PORTFOLIO

In addition to its flagship gold projects, Atacama Resources holds a portfolio of exploration assets across established Canadian mining districts. These properties provide exposure to both gold and critical minerals, offering long-term exploration upside and strategic portfolio optionality.

GOLDEN EAGLE

Exploration-stage gold property consisting of 26 claim units located within the Kirkland Lake Gold Camp, approximately 3km south of the Macassa Mine—one of the world’s highest-grade gold operations.

CABO COBALT

Exploration property in Ontario’s historic Cobalt mining district featuring multiple historical showings and a shaft, with reported cobalt, silver, nickel, and micro-diamond occurrences.

LAMOTHE LITHIUM/RARE EARTH

Early-stage lithium & rare earth exploration project in Quebec. Prior prospecting identified lithium-bearing pegmatites supporting phased exploration potential including mapping, sampling, & future drilling.

MYSTERY GRAPHITE

Exploration-stage graphite project located south of Timmins, Ontario, comprising approximately 1,740 acres with historical drill core and early indications of graphite mineralization.

PATH TO VALUE CREATION

Atacama's exploration strategy focuses on disciplined advancement of high-potential assets while maintaining strategic portfolio optionality and capital efficiency.

Systematic drilling & structural targeting at Tannahill.

Evaluation and exploration of the Atacama #3 property.

Exposure to lithium, cobalt, and graphite assets.

Phased exploration aligned with technical milestones.

STRATEGIC JURISDICTION

Atacama Resources' exploration assets are located in Canada's Abitibi Greenstone Belt—one of the world's most prolific and stable mining jurisdictions with a long history of gold discovery & development.

- Located within the Abitibi Greenstone Belt, a globally recognized gold district
- Ontario and Quebec rank among the most mining-friendly jurisdictions in the world
- Extensive infrastructure, skilled workforce, and regulatory framework supporting exploration
- Home to major gold producers including Agnico Eagle and Kirkland Lake operations

MARKET OPPORTUNITY

Year-End Gold Price (USD/oz) | 2000-2026

Gold continues to serve as a global store of value during periods of economic uncertainty. At the same time, declining discovery rates and aging mines highlight the importance of new exploration success in established mining districts.

- Gold remains a core global store of value and portfolio hedge
- Major gold discoveries have declined significantly over the past decade
- Existing producing mines face declining grades and depletion pressures
- Exploration success in proven districts remains critical to future supply

LEADERSHIP & TECHNICAL OVERSIGHT

Atacama Resources combines experienced corporate leadership with decades of geological & exploration expertise in Canadian mining districts.

CORPORATE LEADERSHIP

Thomas (Buddy) Moynihan | Chairman, CEO & CFO

- 40+ years experience in accounting, corporate finance, and capital markets
- CPA; MS Taxation and MBA Accounting, Pace University
- Extensive experience advising and financing emerging companies

Brian Praver | President, Business Development

- Leadership and operational management experience across distributed teams
- Focused on strategic partnerships, capital markets strategy, and corporate growth
- MBA International Business, Adelphi University

Greg Praver | Chief Operating Officer, Director

- Oversees company operations and corporate coordination
- Interfaces with auditors, counsel, transfer agents, and shareholders
- BA (Honors), University of Tampa

GEOLOGICAL & TECHNICAL TEAM

John Grant | Director & Exploration Consultant

- 47 years exploration experience in Ontario gold districts
- Extensive work with both major and junior mining companies
- Fellow, Geological Association of Canada

Wayne Holmstead, P.Geo. | Geological Consultant

- Professional Geoscientist with 40+ years of mineral exploration experience across Canada
- Co-discoverer of the MacLeod Lake Cu-Mo-Au-Ag deposit in Québec
- Extensive experience leading exploration programs and negotiating property agreements with major mining companies

William MacRae | Consulting Geologist, Qualified Person

- 43+ years in mineral exploration and development
- Oversees drilling programs and NI 43-101 reporting
- BSc Geology; postgraduate studies at McMaster University

David Jackson | Research Geologist

- 46 years geological consulting experience
- International project work across multiple mining jurisdictions
- Specialist in geological mapping and exploration targeting

CAPITAL STRUCTURE

Atacama Resources combines experienced corporate leadership with decades of geological & exploration expertise in Canadian mining districts.

SHARE STRUCTURE

Ticker:	OTCID: ACRL
Market Capitalization:	6.16 M
Authorized Shares:	2,900,000,000
Outstanding Shares:	1,619,992,059
Public Float:	1,009,075,897
Restricted Shares:	567,762,112
Par Value:	\$0.0001

SHAREHOLDER & TRADING INFO

Shareholders (100+ shares): ~ 2,400	
Transfer Agent:	Colonial Stock Transfer Co.
Trading Venue	OTC Markets

PLANNED MILESTONES

Near-term objectives focused on advancing exploration while strengthening the company's corporate platform.

EXPLORATION MILESTONES

Advance the Tannahill Property through phased exploration programs

Conduct additional geophysical surveys and target refinement

Initiate follow-up drilling on priority targets

CORPORATE & STRATEGIC INITIATIVES

Evaluate exploration opportunities at Atacama #3 and other portfolio assets

Launch upgraded corporate website and expanded investor communications platform

Expand investor outreach and evaluate strategic partnerships and financing opportunities

Exploration activities subject to financing, permitting, and market conditions.

Atacama Resources International (OTCID: ACRL)

Disciplined exploration in established Canadian mining districts

Atacama Resources is advancing a portfolio of exploration assets within the prolific Kirkland Lake district of Ontario. Through systematic geological work, disciplined capital deployment, and experienced technical oversight, the Company is focused on unlocking long-term value through exploration success.

- Flagship Tannahill gold property located in the Kirkland Lake gold district
- Multiple exploration assets providing portfolio optionality
- Systematic exploration strategy focused on geological validation and drilling
- Experienced leadership and technical team with decades of mining experience

FORWARD LOOKING STATEMENTS

This presentation contains forward-looking statements within the meaning of applicable securities laws. These statements may include plans, objectives, interpretations, expectations regarding exploration activities, potential mineralization, financing, and corporate strategy.

Forward-looking statements are based on management's current expectations and assumptions and are subject to known and unknown risks and uncertainties that could cause actual results to differ materially.

Readers are cautioned not to place undue reliance on forward-looking statements. Additional risk factors are described in the Company's public filings available through OTC Markets and applicable regulatory disclosures.
